7628 West Shore Drive
The Colony, TX 75056
(214) 235-3377

Congratulations on purchasing your custom made WakesnWaves Spaceman board!!!

What's Included:

- 1 Spaceman LED board with rear and front traction pads
- 1 set (2) of FCS fins (w/adapters)
- 1 micro USB cable with wall adapter
- 1 WakesnWaves drawstring bag

Getting Started:

In order to charge your board, you will need:

- 1.) Micro USB cable (included)
- 2.) Wall adapter (to plug your micro USD cable into)
- 3.) LED Hue app
Android: <https://play.google.com/store/apps/details?id=com.spled.ppze>
Apple: <https://apps.apple.com/us/app/led-hue/id1373080687>

Charging Your Board:

- 1.) First, make sure the LED's on your board are OFF by pressing the on/off button (located on the TOP of the board)
- 2.) Next, connect the micro USB cable to the micro USB port located on the BACK of the board
- 3.) Allow 6 hours for your board to fully charge

Using Your Lights:

- 1.) If you have not done so already, download the LED Hue app
- 2.) Turn your board's LED lights ON using the on/off button
- 3.) Open the LED Hue app
- 4.) Upon opening the app, you will see a list of available Bluetooth devices
- 5.) Select the one labeled "Spaceman" (if it does not come up, swipe your finger down to refresh the list)
- 6.) Once selected, press enter
- 7.) Your board's lights are now completely controlled by you

Tips:

- 1.) Be careful not to drop your board or bang the rails on anything. If you crack the fiberglass we can send out a ding repair kit upon request.
- 2.) When your board is not in use, turn LED's off to preserve the battery life of the board
- 3.) It is recommended that you keep your board in a board bag when not in use to prevent delamination.

Enjoy your board, and as always practice safe boating!
